

(Unclassified // FOUO)

CSWC Operational Period Summary

1800 February 14 2018 to 0600 February 15 2018

# Don't Forget Your Pets

Bring them indoors

Make sure they have a warm dry place with  
plenty of food and water

[weather.gov/winter](http://weather.gov/winter)

With cold temperatures on the way by early next week, don't forget about your furry friends.

## National Terrorism Advisory System

**Unclassified // FOUO**  
**24 Hour STAC Report**

- Report Attached

## SITUATION SUMMARY

### Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Normal Operations	Normal Operations	Normal Operations	Normal Operations

#### Cal OES COASTAL REGION

- Nothing significant to report.

#### Cal OES INLAND REGION

- Nothing significant to report.

#### Cal OES SOUTHERN REGION

- Nothing significant to report.

## **FIRE ACTIVITY**

### **Cal OES Fire Preparedness Levels**

<b>National</b>	<b>Northern California</b>	<b>Southern California</b>
<b>Preparedness Level 1</b>	<b>Preparedness Level 1</b>	<b>Preparedness Level 2</b>
	<b>Multi-Agency Coordination System MACS Mode: 1</b>	<b>Multi-Agency Coordination System MACS Mode: 1</b>

Please note: The National and Regional Preparedness Levels are maintained by the National Multi-Agency Coordination (MAC) Group and are separate from Cal OES activation levels.

- Nothing significant to report.

# MAJOR ROAD / HIGHWAY / BRIDGE CLOSURES

Major Road Closures		
Northern California	Central California	Southern California
No Lifeline Route Closures	No Lifeline Route Closures	No Lifeline Route Closures

## Lifeline Routes

- There are no lifeline route closures.

## Non-Lifeline Routes:

Santa Barbara County

- On 01/09/18, State Route 192 was closed from 1.6 mi east of Santa Barbara at Sycamore Canyon Rd. to Cravens Ln. due to a mudslide. The route has not reopened.

## Wildfire Closures:

- There are no wildfire route closures.

## Emergency Center Activations:

- There are no Emergency Center Activations.

## California 911 System

CA 911 Outages		
Northern California	Central California	Southern California
No 911 Outages	No 911 Outages	No 911 Outages

### 911 Outages/Remote/Community Isolations:

- None reported.

### Service Interruptions:

- None reported.

# WEATHER OF CONCERN

## Weather of Concern

- Gusty offshore winds develop late tonight into Friday which could elevate fire weather danger briefly in Southern CA.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

Atmospheric pattern looks to be consistent with a dominant ridge off the coast and inside slider like systems rotating around the ridge and providing impact periods to Northern California. System passage timing is a little more suspect next week but the overall weather pattern looks to be modeled well. Expect periods of light precipitation favoring the north and east and moderate wind flow episodes.

The wind flow will transition to a northerly one with moderate gusts lasting through tonight. Humidity values will be lower today with a few teens in the Sacramento Valley possible.

Ridging will occur on Friday and lead to light winds and warmer temperatures. Humidity values will remain consistent with some teens possible in the Valley. The ridge will begin to break down during the weekend due to another inside slider system but a stronger break down should occur by the middle of next week. Regardless of the timing of the storm systems, temperatures will trend much cooler and become cooler than normal.

Some precipitation is expected during this period favoring the far north and east, but amounts once again would be light. A northerly wind flow looks to be dominant during the earlier half of next week.

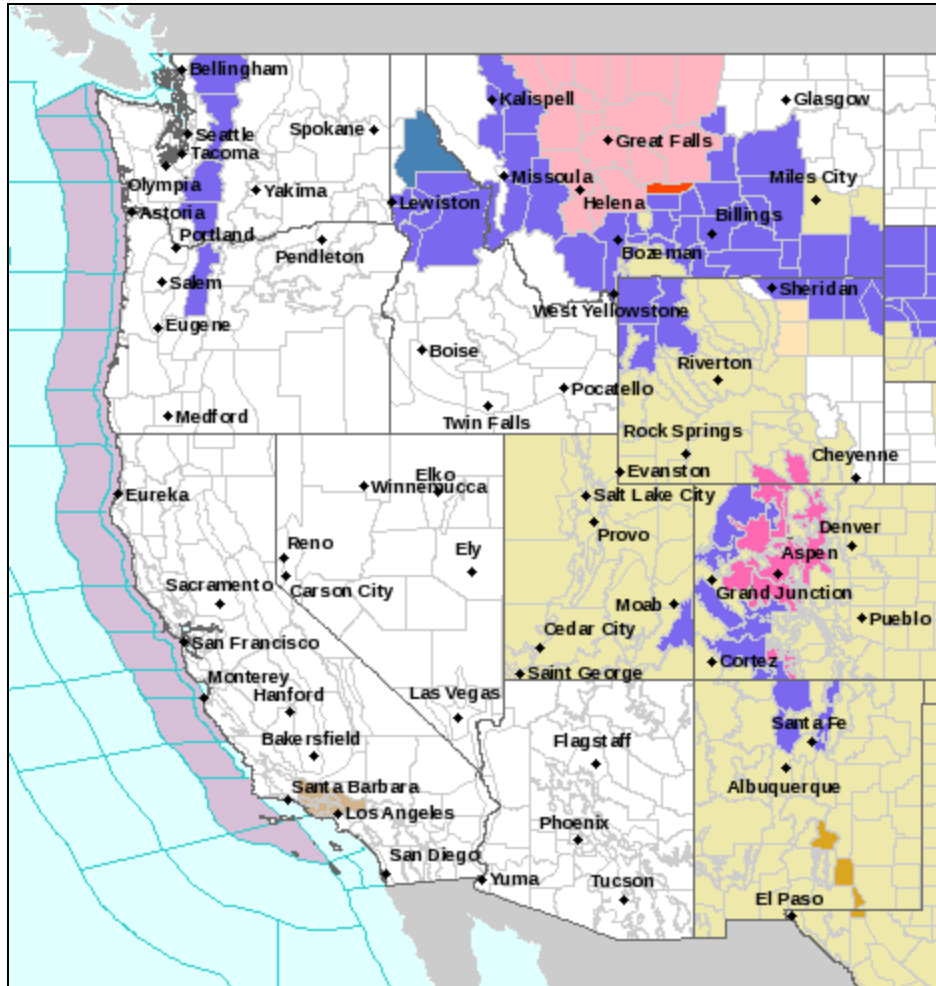

## **SOUTHERN CALIFORNIA**

Scattered showers with less than a quarter inch of rainfall will move across Southern California into this morning. The snow level will be around 6,000 feet. Temperatures will remain near normal today, with 40s to low 50s across the mountains and upper 50s and 60s in the valleys.

Temperatures will warm 5 to 10 degrees and minimum humidity will drop into the teens Friday and Saturday as a ridge of high pressure builds into California from the Pacific Ocean. Northeast winds of 15 to 25 mph with gusts to 40 mph will surface across the mountains and below the canyons and passes of Southern California tonight through Friday morning. Another Pacific trough will drop down the West Coast which will bring well below normal temperatures Sunday through the middle of next week. This trough may also bring scattered showers at times with low snow levels. Precipitation totals will be light with this trough. There will be strong westerly winds over the mountains and deserts Sunday through the middle of next week.
